Liquor Store Point of Sale Software

Wolf Track's Liquor Store POS software includes tools to help you to increase your sales and boost your store's profitability. Automatically set prices based upon a specific markup or margin rate. Provide discounts based upon ticket, line item, or for special customers. Even handle case breakage quickly and easily.

Wolf Track Liquor Store POS also helps to protect you and your employees from selling liquor to underage customers. Our age validation feature gives you the added comfort of knowing that your employees are being reminded to check for valid ID's. Check which employee sold an item and what they put in as the age of the customer. You can also see whether an ID was checked based on the receipt.

Remember to include The Liquor Connection – a pre-configured liquor database with thousands of pre-loaded SKUs for all of the most popular products you carry. This feature will save you time and money when opening a new liquor store.
